

# Lead Shot Machine

Leadmac's lead shot machine is able to produce lead shots between 1.7 mm and 3.25mm with high quality by energy saving. The machine separates products by diameter. Products, which are out of tolerance, are taken back to melting cauldron in order to use them again without any material losing. Chemicals are not used at the lead shot machine for producing.

<b>CAPACITY</b>	425 kg/h (average)
<b>POWER</b>	36 kw
<b>DIMENSIONS (LXWXH)</b>	13000x4200x4000 mm
